

IT Professional

Rotherham South Yorkshire

We intend to increase our Rotherham-based development team to support continuing growth providing document and content management solutions.

You will form an integral part of our software engineering department, providing all aspects of the software lifecycle process to Clarity customers, predominantly working with records, document, and web content management solutions.

The successful application may also be required to provide technical sales support to the sales team when required.

Key duties and responsibilities :

Design, installation, configuration, training and support of electronic document, records and content management systems.

Hardware system design, installation and testing.
Specification of system requirements.

Liaise with Project Managers and project team members to ensure projects are completed within schedule.

Maintain and develop technical skills to meet the demands of a changing and evolving environment.

It is expected that successful candidate will have prior experience in a similar role, demonstrating the ability to work within teams or on their own initiative to deliver required components to quality, time and cost constraints. You will have strong interpersonal, written and verbal communications skills.

Knowledge and experience of records, document and web content management systems would be a distinct advantage but are not essential as full training will be provided.

Apply with CV to:
